

## GETTING STARTED

Insert the CD and the installation should begin.

A shortcut to the program will be placed on the desktop and added to the Programs Menu. In the folder on the Programs Menu you will see the program, the option to Uninstall, the Documentation, and a copy of a Session Detail Sheet to make copies of.

When first opening the program, it will stop at a screen prompting for a Registration ID. The program will run for 15 days before requiring registration to continue using it.

Begin by entering Chassis, Tracks and Tire information if available. This is the core information needed to begin using the program.

Thank you for trying Stock Car Stats Pro! If you have problems, please contact us at [support@stockcarstatspro.com](mailto:support@stockcarstatspro.com).
